7 BG_COLOR = (245, 245, 245)

8 GROUND_COLOR = (80, 80, 80)

```
9 GRAVITY, JUMP_FORCE = 0.6, -14
10 HIGH_SCORE_FILE = "dino_highscore.txt"
11
12
13 def dino_tint(on_ground):
14 """Return an (r, g, b) colour ov...
```

Assistant

The bug is on game.py:144 — the high-score comparison is inverted. I'll fix that first, then implement the three feature stubs (`dino\_tint`, `on\_obstacle\_passed`, `max\_jumps`), one commit each.

Assistant

[Tool call: Edit]

User

[Tool result: The file /Users/adyanthmallur/36_dinoRun/game.py has been updated successfully. (file state is current in your context — no need to Read it back)]

Assistant

[Tool call: Bash]

User

[Tool result: [main 4394bb6] Fix high score never updating due to inverted comparison
1 file changed, 1 insertion(+), 1 deletion(-)]

Assistant

Now the three features, starting with `dino\_tint`.

Assistant

Assistant

[Tool call: Bash]

User

*[Tool result: OK
9f1d2fd Enable double jump
784cb59 Add combo counter for consecutively cleared obstacles
0eb8fc6 Add blue dino tint while airborne
4394bb6 Fix high score never updating due to inverted comparison
dd49299 edit readme for submission reqs]*

Assistant

All 4 commits are in on `main`, and game.py compiles cleanly:

1. `4394bb6` — Fix high score bug (comparison was backwards)
2. `0eb8fc6` — `dino\_tint`: dino turns blue mid-air, green on ground
3. `784cb59` — `on\_obstacle\_passed`: combo counter printed to console, resets on collision
4. `9f1d2fd` — `max\_jumps`: double jump (returns 2)

I didn't push — let me know if you want these pushed to your remote. Per the handout, you'll still need to: record before/after gameplay videos, and export this chat history as a doc/PDF for submission.

User

wait i need to make um a video of the thing working before any changes please allow me to do that

Assistant

Good call — since I already committed the fix, the buggy version isn't in your working directory anymore. Let me pull the original code out to a temp file so you can run it and record the "before" video without touching your commits.

Assistant

[Tool call: Bash]

User

[Tool result: done]

Assistant

[Tool call: Bash]

User

*[Tool result: 15: pass
20: pass
25: pass
41: pass
144: if self.high_score > current:]*

Assistant

That's confirmed as the original broken version (bug + empty stubs intact). Run this to launch it for your video:

Assistant

[Tool call: Bash]

User

*[Tool result: Command running in background with ID: bysnb1vgp. Output is being written to:
/private/tmp/claude-501/-Users-adyanthmallur-36-dinoRun/9c8629d0-f49c-4a0d-9e20-e756ed9f166a/tasks/bysnb1vgp.output.
You will be notified when it completes. To check interim output, use Read on that file path.]*

Assistant

The game window should now be open on your screen — go ahead and start your screen recording, then play a bit (press Space to start/jump) to show the "before" behavior. Once you've got your ~10 seconds, let me know and I'll close it.

[Tool result: /opt/homebrew/bin/brew

Homebrew 6.0.22]

Assistant

Your system only has Python 3.14, which is too new for pygame's precompiled wheels. I'll install Python 3.12 via Homebrew (pygame has ready-made wheels for it) and build a venv from that instead — this only adds a python@3.12 formula, nothing destructive.

Assistant

[Tool call: Bash]

User

[Tool result: pygame installed OK]

Assistant

Now let's launch the pre-fix game for your recording.

Assistant

[Tool call: Bash]

User

[Tool result: Command running in background with ID: b4j3l7xqb. Output is being written to: /private/tmp/claude-501/-Users-adyanthmallur-36-dinoRun/9c8629d0-f49c-4a0d-9e20-e756ed9f166a/tasks/b4j3l7xqb.output. You will be notified when it completes. To check interim output, use Read on that file path.]

Assistant

The game window should be opening now — go ahead and start recording, play for ~10 seconds (Space to start/jump), and you should see the bug: even a high score won't get saved/beaten on screen (best score display stuck). Let me know when you're done and I'll close the window.

User

```
<task-notification>
<task-id>b4j3l7xqb</task-id>
<tool-use-id>toolu_01EkJyKGWMrnEZWNUKfb9yrj</tool-use-id>
<output-file>/private/tmp/claude-501/-Users-adyanthmallur-36-dinoRun/9c8629d0-f49c-4a0d-9e20-e756ed9f166a/tasks/b4j3l7xqb.output</output-file>
<status>completed</status>
<summary>Background command "Run the original pre-fix game for recording" completed (exit code 0)</summary>
</task-notification>
```

Assistant

The game process exited cleanly (exit code 0) — that's normal, it happens when you close the window. Did you get your "before" recording, or did it close before you were ready?

User

where tf is the video i think it recorded idk

Assistant

To be clear — I never recorded anything. I don't have the ability to capture your screen; I can only launch the game window. When I said "start recording," I meant using your own Mac screen recorder.

On macOS, to record a video:

```
```bash
```
```

(no command for this — it's a keyboard shortcut) Press **Cmd+Shift+5**, choose "Record Entire Screen" or "Record Selected Portion," click **Record**, then click the stop icon in the menu bar when done. It saves to your Desktop as a `.mov`` file automatically.

Since the game window already closed, want me to relaunch the pre-fix version again so you can do the recording properly this time?

User

```
<bash-input></bash-input><bash-stdout>[No output was captured. The command ran in the terminal pane (tab 0); if it should have printed something, use read_terminal with tab_id "0" to check.]</bash-stdout><bash-stderr></bash-stderr>
```

User

[Request interrupted by user]

User

ok wait run the game again

Assistant

[Tool call: Bash]

User

[Tool result: Command running in background with ID: b3ycfy93e. Output is being written to: /private/tmp/claude-501/-Users-adyanthmallur-36-dinoRun/9c8629d0-f49c-4a0d-9e20-e756ed9f166a/tasks/b3ycfy93e.output. You will be notified when it completes. To check interim output, use Read on that file path.]

Assistant

The game window is open again. Now on your Mac: press **Cmd+Shift+5**, pick "Record Entire Screen" or "Record Selected Portion," click **Record**, then play the game (Space to start/jump) for ~10 seconds, and click the stop icon in the menu bar when done — it saves a `.mov`` to your Desktop. Let me know once you've got it and I'll close the game window.

User

ok done, kill the game make the changes and then let me record it again

Assistant

[Tool call: Bash]

User

[Tool result: killed (or was already closed)]

Assistant

Good, that's just the skill closing it (exit 144 = terminated by signal). The fixes are already committed to your actual `[game.py](game.py)` — nothing left to change. Launching the fixed version now for your "after" recording.

Assistant

[Tool call: Bash]

User

[Tool result: Command running in background with ID: bo3aud1tf. Output is being written to: /private/tmp/claude-501/-Users-adyanthmallur-36-dinoRun/9c8629d0-f49c-4a0d-9e20-e756ed9f166a/tasks/bo3aud1tf.output. You will be notified when it completes. To check interim output, use Read on that file path.]

Assistant

The fixed game is running now. Same as before: ****Cmd+Shift+5**** → Record → play for ~10 seconds. This time you should see: the dino turn blue mid-air (double jump works too — try tapping jump twice), a "Combo: N" line printed to the terminal each time you clear an obstacle, and a properly updating high score. Let me know when you're done recording.

User

commands to

Assistant

Looks like your message got cut off — what did you need commands for?

User

commands to push

Assistant

[Tool call: Bash]

User

[Tool result: origin https://github.com/SETAPESU26/36_dinoRun (fetch)
origin https://github.com/SETAPESU26/36_dinoRun (push)]

Assistant

Your `origin` currently points at the class org repo (`SETAPESU26/36\_dinoRun`), not your personal account — and the lab says not to push/PR there. You need to fork it to your own GitHub account first. Two ways:

****Option A — I fork it for you via `gh`, then push:****

Assistant

[Tool call: Bash]

User

[Tool result: github.com
✓ Logged in to github.com account Adyanth-212 (keyring)
